About Me

I am a B.Tech student pursuing Computer Science and Engineering (CSE) with a focus on Data Science (DS) at VJIT. With a strong foundation in both web development and game development, I am passionate about building impactful solutions and continuously expanding my technical skills.

Skills

- Management Skills
- Creativity
- Digital Marketing
- Data Visualization:
- HTML/CSS
- Node JS & React JS
- Python

Education

- Intermediate-MPC
Army Public School , Golconda 2014 - 2020
- Intermediate-MPC
KV No.2, Golconda 2020 - 2022
- Bachelor of Technology
VJIT 2022- 2026

Projects

- Real-Face Emotion Analysis
Python 2016 - 2020
Used Python, OpenCV, and deep learning to detect and classify emotions in real-time through webcam input — applicable in mental health monitoring.
- Weather Forecast Web App
Node.js , react.js , open api 2019 - 2020
Real-time weather dashboard using OpenWeatherMap API, featuring 3-day forecasts, hourly data visualized via Chart.js, and modern UI with 3D CSS effects.
- Inventory Management System
React.js & Sql 2017- 2019
LBuilt using web technologies with localStorage to track stock levels, item categories, and low-stock alerts. Includes CRUD operations and search features.
- Cafeteria Management System
HTML&CSS 2016- 2017
A full-stack food ordering and admin monitoring platform built with HTML, CSS, and JavaScript. Features include dynamic cart, real-time order queue, payment system, and admin dashboard using localStorage.
